Ecodan Heat Pump Service and Maintenance for Homeowners

As part of our annual maintenance package, a member of our Ecodan After Sales Team will visit your home or business to complete a comprehensive 30 point check on your heating system, which ensures it is running optimally.

By servicing your heating system annually you ensure that your system runs efficiently, and that your warranty conditions are met, as well as reducing any potential costly issues in the future.

Our engineers will leave your system running at its optimum efficiency as well as answer any questions you may have regarding your heat pump and provide you with peace of mind.

Key areas covered during the Annual Service check	
OUTDOOR UNIT	<ul style="list-style-type: none">● Clean outdoor unit of debris● Clean the evaporator to maximise efficiency● Straighten fins on evaporator*● Check noise levels● Check electrical and plumbing connections● Verify compressor function
INDOOR UNIT	<ul style="list-style-type: none">● Clean system filters and strainers● Remove air from the system● Verify flow rates for heating and hot water● Verify C.O.P (unit efficiency)● Recommission controller● Top up system pressure

*Badly damaged fins may not be able to be straightened

Maintenance Request Form

Price for Service and Maintenance of an
individual Ecodan System: **€249.99***

(price includes 13.5% VAT)

*Price is valid from 1st April 2023 to 31st October 2023.

Price may be subject to change once your Ecodan System has been assessed.

By servicing and maintaining your Ecodan system annually, not only do you prolong the lifespan of your system, but it means you maintain your warranty*.

Benefits of Our Service and Maintenance Plan package

- ⦿ Compliments and maintains Mitsubishi Electric's equipment
- ⦿ Prolongs the life of your Ecodan system
- ⦿ Ensures that your Ecodan heating system is operating at maximum efficiency
- ⦿ Peace of mind your system is operating correctly
- ⦿ We can sign you up for a reminder for when your next service is due

*Warranty is from the date of install and is dependent on the Ecodan system being serviced annually by an approved Mitsubishi Electric Ecodan service agent.

Smart Device Control

The Mitsubishi Electric Wi-Fi adaptor allows users to control their home heating using our Melcloud App, the adaptor is suitable for all Ecodan heat pumps and allows you to control your heating and hot water from anywhere in the world.

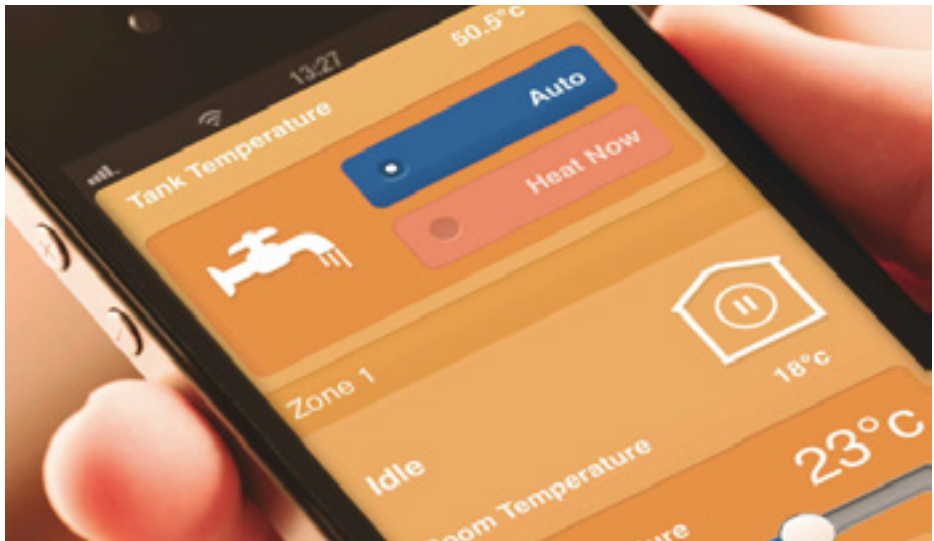

Melcloud also allows you to monitor the running cost and temperature history of your heating system and to adjust your heating schedule.

The Smart device control can in some instances allow us to remotely diagnose and fix problems immediately and could prevent the need for a home visit.

Compatibility of the homeowner's network is a requirement for this Wi-Fi service.*

*Separate terms and conditions of use apply to this service

Talk to your service agent for more information on Smart Device Control
